Profile

An energetic college techie, currently pursuing a BS/MS degree in Computer System and Engineering. Hands-on experiences in installation and configuration of hardware and software including coding and cybersecurity. Like to work on challenging projects, leveraging my skills and knowledge. A self-starter and a team player.

Education | Certifications

Rensselaer Polytechnic Institute **07/2018– 05/2022**

B.S in Computer and System Engineering, GPA: 3.1

Courses: Data Structures, Discrete Mathematics

CompTIA Security+ ce: CompTIA License SY0-501 **08/2019**

Experience

Helpdesk Student Consultant **07/2019 – Present**

Rensselaer Polytechnic Institute Voorhees Computing Center

- Performing computer troubleshooting for university community
- Troubleshooting printer problems throughout campus, performing LMS maintenance, and diagnosing student laptop problems

Undergraduate Physics 1 Teacher Assistance **01/2019 – 05/2019**

Rensselaer Polytechnic Institute School of Science

- Guided students of Physics 1 through the fundamentals of Newton's & other laws
- Supervised labs and test sessions of 27 students, kept up with class discussion and worked in collaboration with faculty, graduate students and professor

Computer Technician (Part-time) **06/2016 – 05/2018**

TAG LLC

- Assisted in computer hardware and software support including upgrades, software patching, virus protection and firewall configuration
- Installed Wi-Fi Routers, configured AP hotspots and established Wi-Fi WPA2 Enterprise

Software Projects

Bukkit Minecraft Server

Configured and deployed game server using Amazon Web Service platform

- Computed on AWS EC2 instances with autoscaling policies
- Leveraged AWS S3 buckets to store information of gaming data for analysis
- Configured CloudWatch for security events and alerts such as DDoS, game sessions hacking and unauthorized access.

DECA Inventory Tracking System

Implemented ITS platform for high school DECA Store to track inventory and accounting

- Developed frontend using JavaFX GUI
- Developed backend using Java JDBC and MySQL

Skills

- *Programming Languages:* C, C++, Java, Python, SQL, MATLAB, HTML/CSS/JS
- *Operating Systems / Platforms:* Windows, macOS, Unix, Linux, Amazon Web Service, Google Cloud Platform

Activities

Member of Society of Asian Scientist & Engineers (SASE), Member of Rensselaer Motorsport, Member of RPISEC,
Attended AWS Summit 2018 & 2019, Attended Google Cloud Security Event
