# Richard Tsai

☏ (516) 444-5091 | richtxo.github.io | richtxo@gmail.com

## Profile

An energetic college techie, currently pursuing a BS/MS degree in Computer Science with concentration of ML/AI. Hands-on experiences in installation and configuration of hardware and software including coding and cybersecurity. Like to work on challenging projects, leveraging my skills and knowledge. A self-starter and a team player.

## Education | Certifications

**Rensselaer Polytechnic Institute** **07/2018– 05/2022**

Bachelor of Science in Computer Science

*Courses:* DS, Discrete Math, Algo, OS, PSoft, Prog Lang, Data Mining, SD&D

**CompTIA Security+ ce:** CompTIA License SY0-501 **08/2019**

## Experience

**Cybersecurity Defensive Operations Programming Intern** **05/2021 – 08/2021**

*The MITRE Corporation*

- Worked as a full-stack developer in an IDS/IPS project with Postgres and Redis, Python flask, and VueJS
- Leveraged JIRA for project tasks, assignments & collaboration with team members

**Cybersecurity Defensive Operations Intern** **06/2020 – 08/2020**

*The MITRE Corporation*

- Worked on project for analysis of network & host-based log data using Zeek & companioned with ELK dashboard
- Monitored another project's app that crawls websites & making a new front-end using AngularJS and dockized it

**Helpdesk Student Consultant** **07/2019 – Present**

*Rensselaer Polytechnic Institute Voorhees Computing Center*

- Performing computer troubleshooting for university community
- Troubleshooting printer problems throughout campus, performing LMS maintenance, & diagnosing student laptop problems

## Personal Projects

**YACS – Open-Source Schedule Management @ RCOS – Project Leader**

*Yet Another Course Scheduler – an open-source project to help students plan out their semester*

- Configured the SSL and mitigate client-side attacks for the Vue.JS front-end Docker container
- Optimized Vue.JS handling of persisted cookies to save student's selection

**Lil Tim**

*Another Discord Bot because other bots were lagging during lockdown*

- Developed in Java using the Java Discord API (JDA), Lavaplayer library for music, and others for different features
- Configured an automated CI/CD solution to bring updates from master branch to on-premises raspberry pi server

**Personal Home Lab**

*On-going personal home lab to add more future projects/servers*

- Monitoring and securing network traffic with FortiGate NGFW with custom IPv4 policies, DoS policies and VPN
- Configured port-forwarded on-premises file share server on raspberry pi with necessary firewall settings

## Skills

- *Programming Languages:* C, C++, Java, Python, SQL, Git, Node.JS frameworks
- *Operating Systems / Platforms:* Windows, macOS, Linux, Amazon Web Service, Docker, Kubernetes

## Activities

Member of RCOS, Member of RPISEC, Member of Society of SASE
