Profile

Highly ambitious software development engineer with 1 full year of experience in full-stack development, with a focus on cybersecurity and DevSecOps. Experience with ride range of tech stacks while maintaining good cybersecurity posture and introducing Quality of Life automation with CI/CD pipelines.

Experience

Cloud Application Developer **07/2022 – Current**

IBM

- Performing mainly as a full-stack developer in a project with Gatsby, Apollo Client for GraphQL, Jahia CMS, Drupel
- Collaborating with 6 other developers from different parts of world with Teams and Jira in an Agile standup meeting
- Recommending courses of action for outdated/highly rated risky NPM modules
- Implementing Docker containers to setup development environment easier and faster
- Implementing React error boundaries to avoid runtime errors on frontend
- Building React pages and components based off Figma wireframes from client with JSX and SCSS
- Maintaining/editing Apache rules to ensure Gatsby production and staging environments runs smoothly with client-only routes
- Improving Gatsby build time and website performance by optimizing business logic and reusing Gatsby cache in CD pipeline

Cybersecurity Defensive Operations Programming Intern **05/2021 – 08/2021**

The MITRE Corporation

- Performed as a full-stack developer in an IDS/IPS project with Postgres and Redis, Python flask, and VueJS
- Leveraged JIRA for project tasks, assignments & collaboration with team members
- Performed validations and determine accuracy of API endpoint by testing and evaluating via pytest framework

Cybersecurity Defensive Operations Intern **06/2020 – 08/2020**

The MITRE Corporation

- Performed analysis of network & host-based log data using Zeek & companioned with ELK dashboard
- Monitored and reviewed application that crawls websites
- Developed custom admin dashboard and reporting using AngularJS

Helpdesk Student Consultant **07/2019 – 05/2022**

Rensselaer Polytechnic Institute

- Troubleshooted printer problems throughout campus, performed LMS maintenance, & diagnosed student laptop problems
- Provided support to students & faculties via phone call and remote desktop via Bomgar
- Monitored incoming issues service tickets, track issues, and troubleshooting issues via Zendesk software

Education | Certifications

Rensselaer Polytechnic Institute **07/2018 – 05/2022**

Bachelor of Science in Computer Science

CompTIA Security+ ce: CompTIA License SY0-501 **08/2019 – 08/2025**

Personal Projects

Lil Tim

Another Discord Bot

- Developed in Java using Java Discord API (JDA), Lavaplayer library for music, and others for different features
- Configured an automated CI/CD solution to bring updates from master branch to on-premises raspberry pi server
- Deployed via GitHub Workflows and Docker containers, built in Gradle build tool

Personal Home Lab

On-going personal home lab to add more future projects/servers

- Monitoring and securing network traffic with FortiGate NGFW with custom IPv4 policies, DoS policies and VPN
- Deploying multiple on-home services on a home-built Proxmox server with LXC containers and Window's Hyper-V server
- Implemented CrowdSec open-source system as the network's IPS for extra layer of security

Skills

- *Programming Languages:* C, C++, Java, Python, SQL, Node.JS frameworks
- *Operating Systems / Platforms:* Windows, macOS, Linux, Amazon Web Service, Docker, Kubernetes, GitHub, GitLab
