Profile

An energetic college techie, currently pursuing a BS/MS degree in Computer and System Engineering. Hands-on experiences in installation and configuration of hardware and software including coding and cybersecurity. Like to work on challenging projects, leveraging my skills and knowledge. A self-starter and a team player.

Education | Certifications

Rensselaer Polytechnic Institute **07/2018– 05/2022**

Bachelor of Science in Computer and System Engineering, GPA: 3.01

Courses: Data Structures, Discrete Math, Algorithms, LITEC, IED, Circuits,

CompTIA Security+ ce: CompTIA License SY0-501 **08/2019**

AWS Certified Security Specialty: SCS-C01 **In-Progress**

Experience

Cybersecurity Defensive Operations Intern **06/2020 – 08/2020**

The MITRE Corporation *Remote*

- Worked on project for analysis of network & host-based log data using Zeek & companioned with ELK dashboard
- Monitored another project's app that crawls websites & making a new front-end using AngularJS and dockized it

Helpdesk Student Consultant **07/2019 – 05/2020**

Rensselaer Polytechnic Institute Voorhees Computing Center *Troy, NY*

- Performed computer troubleshooting for university community
- Troubleshooted printer problems throughout campus, performing LMS maintenance, & diagnosing student laptop problems

Computer Technician (Part-time) **01/2019 – 05/2019**

Rensselaer Polytechnic Institute School of Science *New York, NY*

- Guided students of Physics 1 through the fundamentals of Newton's & other laws
- Supervised labs & test sessions of 27 students, kept up with class discussion and worked in collaboration with faculty, graduate students & professor

Software Projects

YACS – Open Source Schedule Management @ RCOS

Yet Another Course Scheduler – an open source project to help students plan out their semester

- Configured the SSL and mitigate client-side attacks for the Vue.JS front-end Docker container
- Optimized Vue.JS handling of persisted cookies to save student's selection
- Assisted of introducing other students to the JS framework and Docker on Windows

Bukkit Minecraft Server

Configured and deployed game server using Amazon Web Service platform

- Computed on AWS EC2 instances with autoscaling policies
- Leveraged AWS S3 buckets to store information of gaming data for analysis
- Configured CloudWatch for security events and alerts such as DDoS, game sessions hacking and unauthorized access.

DECA Inventory Tracking System

Implemented ITS platform for high school DECA Store to track inventory and accounting

- Developed frontend using JavaFX GUI
- Developed backend using Java JDBC and MySQL

Skills

- *Programming Languages:* C, C++, Java, Python, SQL, Node.JS frameworks
- *Operating Systems / Platforms:* Windows, macOS, Unix, Linux, Amazon Web Service, Google Cloud Platform

Activities

Member of Society of Asian Scientist & Engineers (SASE), Member of RPISEC, Member of RCOS
